

**Technical Visit - Contract No. HY/2009/19  
Central – Wan Chai Bypass – Tunnel (North Point Section) and Island Eastern Corridor Link**

**Venue:** Project Site at Oil Street, North Point (refer to location map below)

**Date:** 1 March 2014 (Saturday)

**Time:** 10:00a.m. – 12:00p.m.

The Central – Wan Chai Bypass and Island Eastern Corridor Link (CWB) is a strategic road along the north shore of Hong Kong Island to relief traffic congestion along the existing trunk road connecting Central and North Point. Its construction and operation, managed by the Highways Department (HyD) of HKSAR, is a Designated Project under the Environmental Impact Assessment Ordinance (EIAO). Comprehensive EIA had been conducted and completed in 2009 in accordance with the EIAO and the Study Brief issued by the HKSAR Government. Following the approval of the EIA Reports, an Environmental Permit (EP) which imposes conditions to govern the construction and operation of the CWB was issued to HyD in 2009.

CWB is a mega-scale infrastructure project in close proximity to the local community. Its construction involves dredging, reclamation and road construction, posing water, air and noise nuisances to the neighborhoods. To effectively oversee its environmental performance, the EP mandates HyD to engage an Environmental Team (ET) to perform an EM&A Programme, and an Independent Environmental Checker (IEC) to verify the results of the EM&A programme in accordance with the EIA requirements.

The visit will enable members to have a better understanding of the implementation of a comprehensive EM&A programme with environmental control measures in accordance with the EIA requirements for construction of Central-Wan Chai Bypass and Island Eastern Corridor Link.

**Registration**

The site visit is free of charge. If you are interested to join, please complete the on-line registration by clicking the link below. For any queries, please send email to M.H. Isa (azanhk@yahoo.com), Event Organizer of HKIEIA.
